

User's Guide for the Transcoding Software

Thank you for purchasing PMP.
This transcoding software is the bundled software, HT Video Splitter and Joiner V2.0, developed by Honestech Co., Ltd.
In case your PMP can not play the video file, you can convert it to the appropriate video file using this transcoder.

Caution

- Please read and be aware of the manual before using this software. Please install and use it with proper way based on this manual.
- Please keep the **serial number of the software on this Quick start**. It is required when you reinstall the software. Please store the serial number in the safe place.
- The below programs are required to be installed for using this software on your PC.
 - DirectX from Microsoft is required to be installed for using this software on your PC.
 - MS Windows Media Player Version 9.0 (or later) is required to be installed for using this software on your PC.
 - The bundled "MP3 codec" and "Xvid codec" are required to be installed for using this software on your PC.
 - You can download the latest version of DirectX and Windows Media Player from the download center in Microsoft Home page(www.microsoft.com).

1. Installation

A. Codec installation

The "Xvid" Codec is based on MPEG4 and bundled by Digital Cube under GPL license.

You can transcode the video files with WMV and ASF to Xvid. You can play the WMV and ASF video files after the transcoding.

1. Please insert software CD and execute window explorer.
2. Select CD ROM drive.
3. Click and install "MP3 codec.exe."
4. Then Click and install "Xvid codec.exe."
5. Please click "Next" or "Agree" during execution of installation process, if not specifically stated.
6. Click "Finish" after installation, then all codec installation process will be completed.

B. Transcoding Software Installation

1. Click and execute "transcoding.exe" in CD ROM drive.
2. Please click "Next", "Agree" or "Confirm", if not specifically stated.
3. When required, please insert the serial number on the label, which is on this Quick start.
4. Click "Finish" when installation completed then all software installation process will be terminated.

2. How to use software

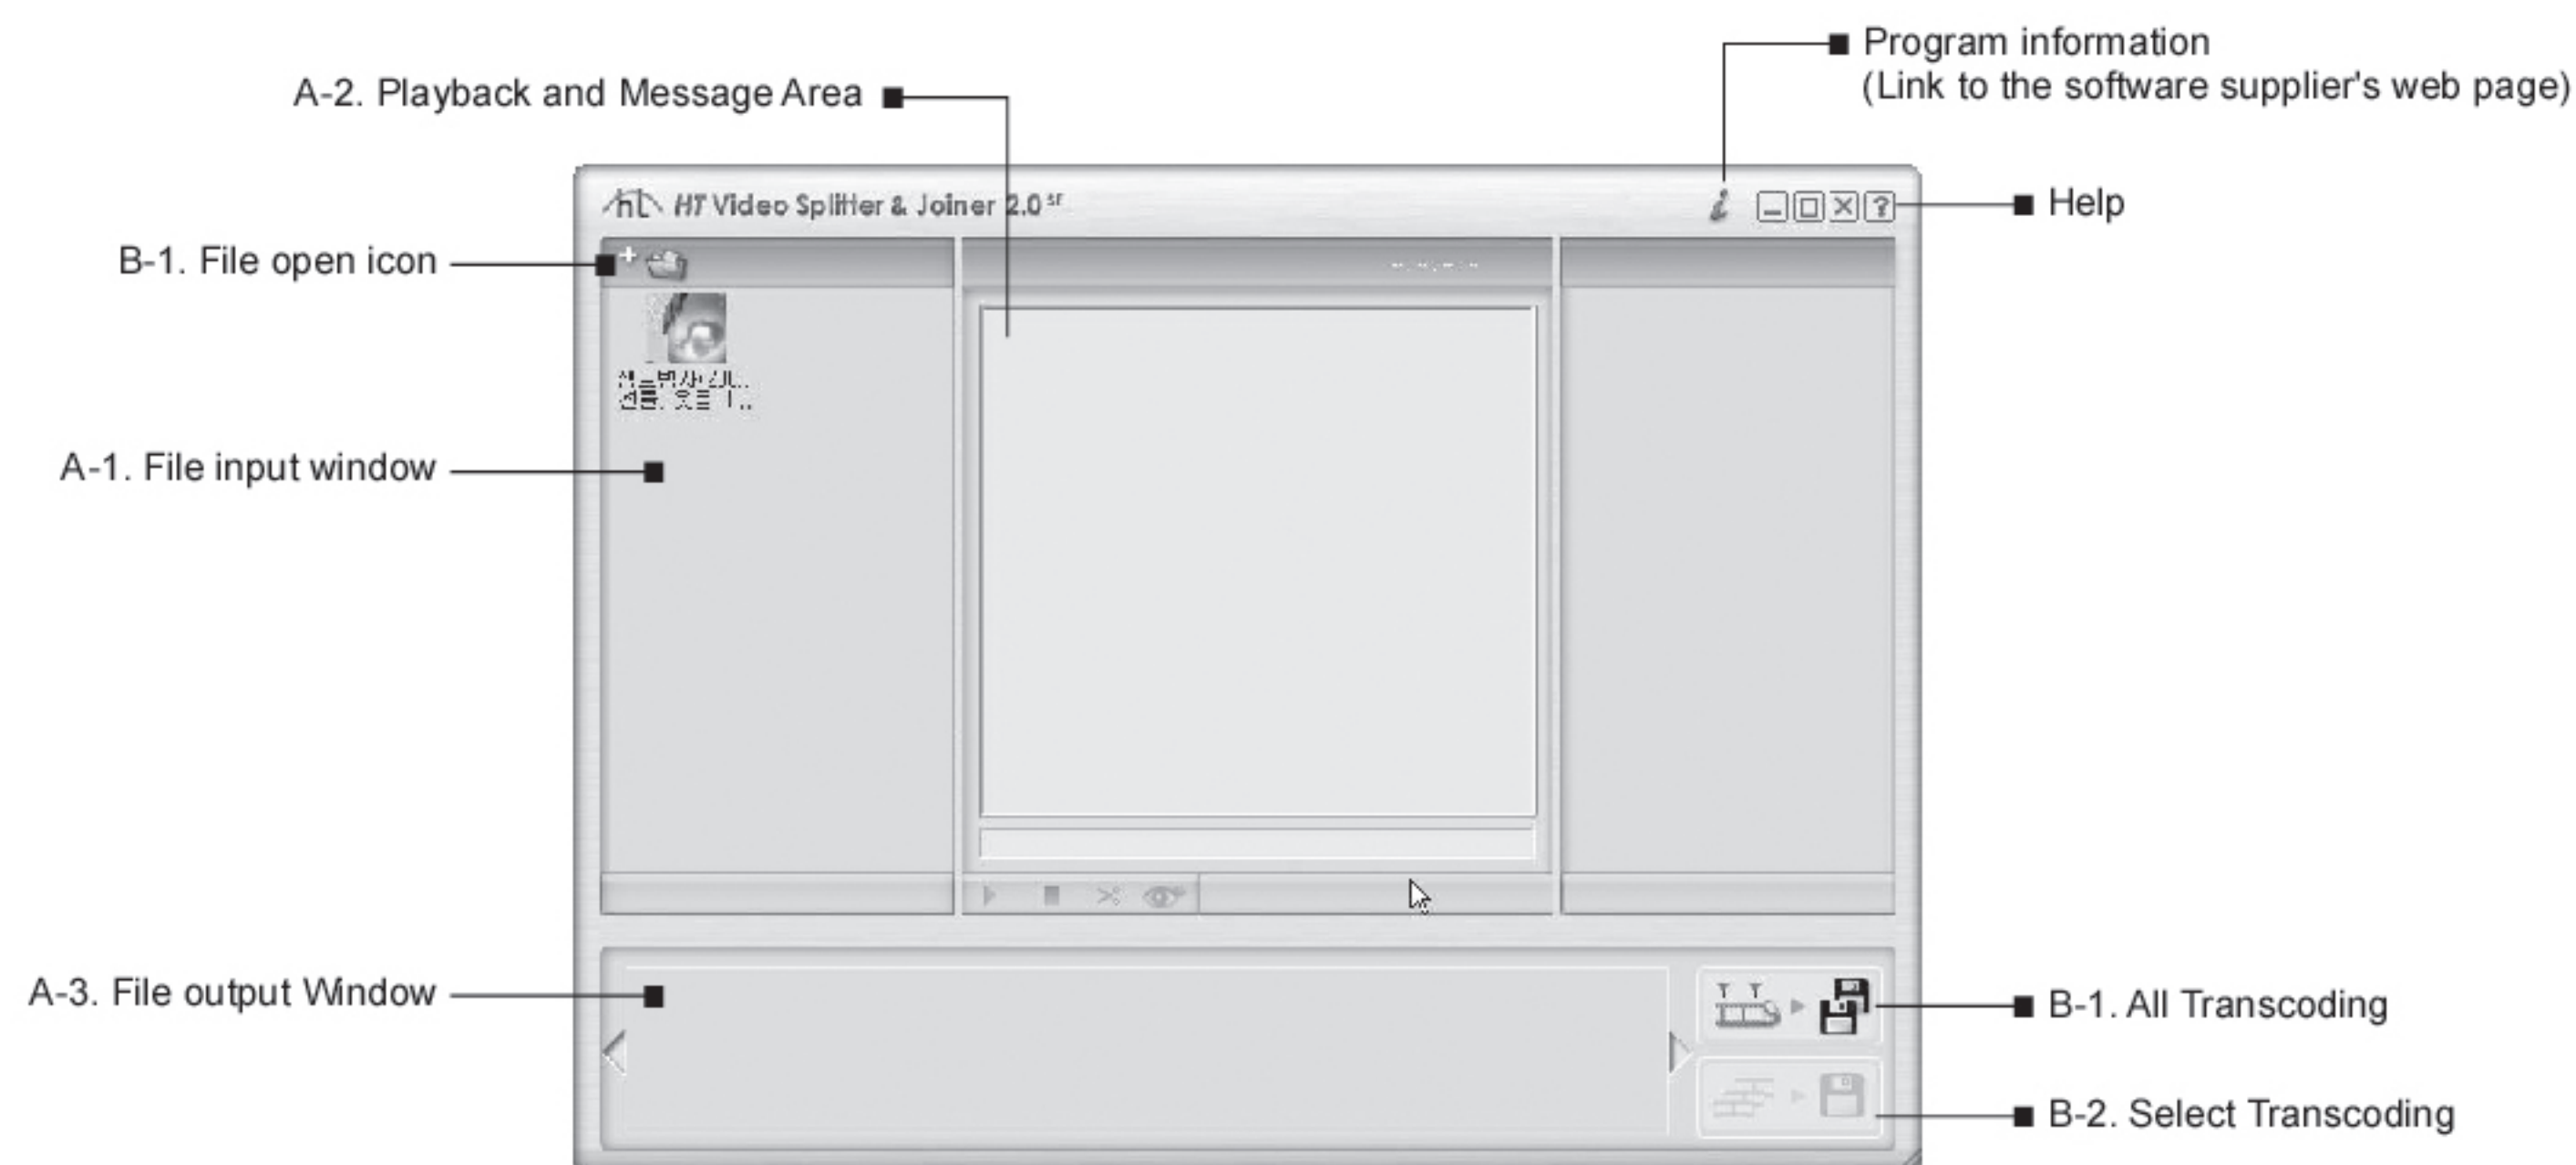

You can refer to the "How to use software" by pressing "?" (Program Help icon) on upper right corner of the menu.

A. User Interface of the software

1. File input window : source files will appear with icon.
2. Playback and Message Area : you can play the files in this area.
3. File output Window : icon will appear in this area after the transcoding finishes.

B. Icon explanation

1. File open icon : you can open the file you want to convert..
2. "All Transcoding" icon :
 - Convert all files in "File Input window", if there is no file in "working progress Window"
 - Convert the files in "Working progress Window", if there are files in "Working progress Window"
3. "Select Transcoding" icon : Convert only the files in "working progress window"

3. How to transcode the files

This transcoder converts the Windows Media file(WMV,ASF) to Xvid file.

You can refer to the "How to use software" by pressing "?"(Program Help icon) on upper right corner of the menu.

1. Click HT Video Splitter & Joiner icon on the screen and execute it.
2. Click "File Open" icon and open the file you want to convert. The selected files appear in "File Input Window".
3. Press the "Convert all" button on right bottom of the screen, then it will convert all the files one by one.
4. If you want to Convert specific files in the "File Input Window", please drag and drop the files in "working progress Window" area.
5. When you press "Convert all" button, it converts only the files in "working progress window". If there is no file in "working progress window", it converts all files in the "File Input Window".
6. Press "Convert selected" button, and it converts files in "working progress Window".
7. The transcoding speed is double times faster than the normal playback speed.(Reference: Pentium 4, CPU 2.1GHz, Memory 256MB)
8. The transcoded files are stored in C:\station folder.
9. If you want to change the name of the storing folder, you can change it from option Menu.
